Jen- Must confess that I made a few more edits to the Exide fact sheet that went to Barry/Carlton this morning. You were cc'd on the message but here it is again.

Subject: Exide Fact Sheet

Barry:

At our last monthly general, we discussed Region 9's expectation that the state of California will be requesting that EPA add the Exide site to the NPL. You may recall that the site was home to a secondary-lead smelter facility where operations caused widespread industrial and residential lead contamination. At our meeting, you requested that OSRTI prepare a one-page fact site sheet; my staff worked with Region 9 to prepare the attached document.

Please don't hesitate to let us know if you have any questions or concerns about the site. - Dana
